Accommodation

There has been no specific hotel accommodation arranged however the hotel to be used by the Speakers is the Royal Horseguards Hotel, 2 Whitehall Court, London SW1A 2EJ. Tel: 020 7437 4370 www.theroyalhorseguards.com

Other hotels in the area are the Westminster City Inn Tel 020 7630 1000 and the Crowne Plaza London St James Tel (020 7834 6655).

Optional dinner on Friday night

If you are arriving in London on the Friday, please join the Speakers and BES Council members for an informal Dinner in the River Room at One Whitehall Place, adjacent to the Royal Horseguards Hotel. The River Room offers views of the River Thames and the London Eye. The cost of the meal and wine is £65.00 per head to include VAT.

Trade exhibition

There will be a Trade Exhibition, featuring a selection of companies, in conjunction with the conference.

CPD

The Meeting will qualify for 5 hours verifiable CPD.

Dietary requirements

To register please visit the BES website or complete this form and return it to: Mrs Annabel Thomas, Administrator, The British Endodontic Society, PO Box 707, Gerrards Cross, Bucks SL9 0XS Tel/Fax 01494 581542
Email bes@athomass99.freeserve.co.uk

Further information and forms can be found on the BES website www.britishendodonticsociety.org.uk

Contact Annabel Thomas, BES Administrator, PO Box 707, Gerrards Cross, Bucks SL9 0XS Tel 01494 581542 Email bes@athomass99.freeserve.co.uk www.britishendodonticsociety.org.uk

Please make all cheques payable to ‘The British Endodontic Society’. The Society is also able to accept the following credit cards: Mastercard / Visa / Maestro / Switch / Visa Debit

Programme
At last year’s Spring Meeting will be held at The Institution of Civil Engineers, One Great George Street, Westminster, London SW1P 3AA. www.oring侑atgeorgestreet.com
This elegant and historical building was built between 1910 and 1913 and is located opposite St James’ Park station in Central London. The nearest underground station is Westminster, under five minutes walk away.

Friday 9th March
8.00 PM
Informal Dinner at One Whitehall Place, Westminster

Saturday 10th March
9.00 – 9.30
Registration and Coffee

9.30 – 09.40
Summary of BES activities 2011
Dr Brett Robinson, BES Past-President

09.40 – 10.00
Presidential Address:
Professor John E Davies, Faculty of Dentistry, University of Toronto

10.00 – 11.00
The Therapeutic Promise of Mesenchymal Stem Cells
Professor John E Davies, Faculty of Dentistry, University of Toronto

11.00 – 11.30
Coffee, Trade Exhibition and Poster Display

11.30 – 12.30
The Therapeutic Promise of Mesenchymal Stem Cells: Part 2
Professor John E Davies, Faculty of Dentistry, University of Toronto

12.30 – 12.45
Prize-Giving

12.45 – 13.45
Lunch, Trade Exhibition and Poster Display

13.45 – 14.15
BES AGM

14.15 – 15.15
New and Older Bioceramic Materials
Professor Markus Haapasalo

15.15 – 15.45
Tea, Trade Exhibition and Poster Display

15.45 – 16.45
NITI.M.CM.: Where is Instrument Development taking us?
Professor Markus Haapasalo

16.45 Close

Speakers
Professor John E Davies
The Therapeutic Promise of Mesenchymal Stem Cells
Mesenchymal stem cells (MSCs) play a central role in tissue repair and regeneration. Indeed, there are today over 100 clinical trials being conducted using MSCs for indications ranging from tissue engineering to the treatment of immune and inflammatory diseases. This presentation will illustrate the importance of MSCs in peri-implant endosseous healing, the design of regenerative biomaterials, and discuss the sources of MSCs available today.

Delegates will learn:
• The essential facts about stem cells and how they are vital to our everyday lives.
• The role of mesenchymal stem cells (MSC) in wound healing and tissue regeneration.
• The promise of using MSC as drugs to treat disease.

John Davies, who is a Professor at the Faculty of Dentistry, is cross-appointed to the Institute of Biomaterials and Biomedical Engineering, and also the Faculties of Applied Science and Engineering, and Medicine. He is the Founding President of Tissue Regeneration Therapeutics Inc – an emerging stem cell company based in Toronto. Professor Davies trained as an anatomist, dental surgeon and oral surgeon in the UK. His PhD, in solid-state and surface physics, was focused on understanding electron and ion transition events important to the operation of semiconductor devices. He has also published textbooks on the harvesting, characterization, and utility of mesenchymal stem cells; and his discovery of the richest source of such cells in human tissue, the perivascular region of the umbilical cord.

Dissclosures: Tissue Regeneration Therapeutics Inc – President, CEO, Shareholder, Paid Consultant; Biomet3i Inc – Past Consultant

Professor Markus Haapasalo
New and Older Bioceramic Materials
The presentation focuses on the physical, biological, and clinical characteristics of some of the bioceramic materials such as MTA, Bioaggregate and Root Repair Material Putty and Pasta. How these properties (should) reflect in their clinical use is discussed.

NITI.M.CM.: Where is Instrument Development taking us?
Rotary NiTi instruments took over endodontic instrumentation more than ten years ago. After a relatively silent phase, new developments have recently challenged “the establishment”. The presentation focuses on the newest developments in the instrument front, such as Ch files, Vortex, SAF, and “one only” instruments such as WaveOne. New and ongoing research results will be presented.

Dr. Haapasalo received his dental degree from the University of Helsinki, Faculty of Dentistry in Finland in 1978. He received his PhD in the 1980s on the microbiology of endodontic infections from the University of Helsinki in 1986, and completed his certificate of endodontics in 1987. He taught and practiced endodontics in private practice and at the university.
