## **ESE awareness campaign on Vital Pulp Treatments**

The ESE has written to the Officers and ESE country representatives of all full member national Endodontic societies and their members, individual members of the Society and dental schools in countries affiliated with the ESE to promote the ESE awareness campaign on the management of deep caries and the exposed pulp and to promote the appropriate use of vital pulp treatments.

The ESE is hoping that all national societies will develop inclusive, effective and dynamic national awareness campaigns that will reach out to all dental professionals, other healthcare professionals (including doctors), other national dental/medical societies and the public.

The key feature of the ESE campaign is to emphasise the appropriate management of deep caries and the advantages of vital pulp therapies.

The ESE has published a position statement - "Management of deep caries and the exposed pulp", see:

<https://onlinelibrary.wiley.com/doi/10.1111/iej.13080>

The position statement is based on a comprehensive review of the subject - "Management of deep caries and the exposed pulp", see:

<https://onlinelibrary.wiley.com/doi/10.1111/iej.13128>
